

Holly Rogers

Passionate about design, efficiency, problem-solving, personal development, and relationships.

PROJECTS

Growing Up — [Client](#) [Server](#) [Live](#)

Full stack app that enables users to track sleeping and eating habits for their children. It incorporates Sass, React Router, and Node.js to see recent sessions. The app uses context to keep front end data current, and PostgreSQL for a data persistence layer.

TECH: HTML, CSS, Sass, JavaScript, React, Node.js, SQL, PostgreSQL

Traveler — [Client](#) [Server](#) [Live](#)

Traveler takes a minimalistic approach to trip planning. Users can find new suggestions based on location or create new trips. It allows users to save new travel plans and view old trips with Node.js, Express, and PostgreSQL.

TECH: HTML, CSS, JavaScript, React, Node.js, SQL, PostgreSQL

MunchMap — [Github](#) [Live](#)

Simplify your meal search with MunchMap! Input a city, and then choose to refine the results by cuisine type or search for all the restaurants nearby. This app integrates two APIs to visualize restaurant results on an interactive map.

TECH: HTML, CSS, JavaScript, jQuery, Mapbox API, Zomato API

EXPERIENCE

Fastpak Systems, Project Specialist

JANUARY 2019 - May 2020

Identified and resolved transactional errors with customer accounts and product inventory

Trained new employees on managing customer accounts, product information, and SAGE CRM software

Managed customer relationships by resolving account issues and resourcing products that best suited their needs
